# Performance Measure Rate Reporting Template with Measure Specification Guidelines for Measurement Year (MY) 2022 DCS CHP - ACC

### Instructions

This Excel workbook has locked cells that include formulas and are highlighted yellow. Each MCO should only provide data in unlocked cells and shall not make a copy of this workbook-this exact workbook must be used for reporting.

- 1. Starting with the "MCO Info" tab, please provide the date of submission, the MCO name, population, reporting unit, NCQA submission information (if applicable); and the name, title, phone number, and email address of the contact for the MCO.
- 2. After populating the "MCO Info" tab, please populate each measure-specific tab within the workbook. Please note that all applicable "Total" and "Subtotal" stratifications are calculated using formulas and do not require direct input from the MCO. This includes any measure-specific tabs that are highlighted yellow, which indicates a tab that does not contain any unlocked cells and does not require any direct input from the MCO. Additionally, for measures that are included in both NCQA HEDIS and the CMS Adult or Child Core Sets, and for which the measure specifications include differing stratifications, separate tabs were included to capture HEDIS-specific and Core Set-specific tabs in such instances. Please note that if the only difference in stratifications between the two measure stewards was the inclusion of "Subtotal" or "Total" rates, these were combined within the same measure-specific tab. MCOs should populate the measure-specific tabs with the information described below:
  - a. Data Collection Methodology The AHCCCS-required data collection method has been included on each tab. For measures required to be reported as hybrid, please denote if your MCO utilized hybrid or administrative data collection in the applicable cell.
  - b. Eligible Population The number of enrollees that satisfied all specified eligible population criteria, including age, continuous enrollment, benefit, event, and the anchor date enrollment criteria. For administrative measures with optional and/or required exclusions, enter the Eligible Population after any exclusions have been applied.
  - c. <u>Hybrid Measures only</u>: Number of Numerator Events by Administrative Data in Eligible Population (Before Exclusions) Enter the administrative numerator events after applying administrative required exclusions, but prior to applying any optional exclusions (as defined within each hybrid measure's applicable specification).
  - d. Final Numerator Used for Rate Calculation The number of all numerator events that were used for rate calculation.
  - e. Other data elements (indicated by a blank white cell) requested where appropriate (i.e., Numerator events by supplemental data, Number of required exclusions, etc.).
  - f. Final Denominator Used for Rate Calculation This should be the final denominator that was used for rate calculation, after ALL exclusions have been applied.
- 3. The Audit Review Table tab is for auditor-MCO rate review communications. Do not enter any data or text in the Audit Review Table tab during the initial rate submission as these fields will be used during preliminary and final rate review.
